GOKHAN CEYLAN

B.Sc. Computer Science & AI · HCI Research and Software Development

ceylan.gokhan01@gmail.com | gokhanceyn.com | GokhanCey | gokhanceylan | Rome, Italy

PROFILE

B.Sc. graduate (110/110 cum laude, Sapienza University of Rome) with first-author research in speech-driven HCI published at ACM ICMI 2026. Builds full-stack, blockchain, and applied AI products: 80+ hackathons attended, 30+ podium finishes. Seeking a research-driven M.S. in Computer Science.

EDUCATION

B.Sc. Applied Computer Science & AI

Sapienza University of Rome

2023-2026 | Rome, Italy

- 110/110 cum laude (top Italian grade); GPA 27/30 (exam avg.)
- Thesis: *A Multilingual Speech-Driven Semantic Input Module for Indoor Navigation Systems*, advised by Prof. Emanuele Panizzi

High School: Dolapoğlu Anatolian High School, Turkey (Science & Mathematics). Ranked 3,783 of 2.38M in the national university entrance exam.

PUBLICATIONS

Gokhan Ceylan, Gabriella Trasciatti, and Emanuele Panizzi. 2026. **A Multilingual Speech-Driven Semantic Input Module for University Indoor Wayfinding.** ACM ICMI Companion '26. DOI: doi.org/10.1145/3776591.3832512

EXPERIENCE

Developer & Thesis Researcher, Gamification Lab

Sapienza University of Rome

Nov 2025-Present | Rome, Italy

- Built an offline, multilingual speech-driven input module and search interface (Flutter) for the NavIndoor app: phonetic correction and fuzzy matching over a 243-room repository.
- Evaluated on 150 spoken queries: 92% top-candidate accuracy, 8.0 ms resolution on consumer mobile hardware. First-author ACM ICMI 2026 paper.

Team Lead & Developer, International Hackathons

Independent

2019-Present

- Led teams or competed solo in 80+ hackathons (Web3, GameFi, ecosystem, AI), building and demoing working prototypes; 30+ podium finishes.
- Alongside, 2019-2022: web projects and translation work (Bionluk), enterprise documentation intern (QNB Finansbank), director of the Ar-Ge student R&D community.

SELECTED PROJECTS

NavIndoor - Bilingual (EN/IT) marketing site for Sapienza's indoor-navigation app. *Astro*
Eterna - Autonomous AI agents persisting on-chain via Amadeus + Arweave. *Next.js, Amadeus, Arweave*
RoomTab - Separates AI context extraction from a deterministic settlement engine so bill-splitting math never hallucinates. *Next.js, Gemini 2.0 Flash, Opik*

AWARDS

80+ international hackathons
30+ podium finishes
$100,000+ in cash prizes won

TRON Grand Hackathon (S3-S7):
12 prizes across 9 projects (3 second, 4 third, 3 fifth place, 2 special prizes): NatureForetold (×2), MetaVotePoll (×2), MusiCoinCity (×2), AurorAqua, DreamVerser, Triton, QuestArcade, TronPixels, IdleTron

Other Awards (selected):
Eterna, Amadeus Genesis Hack - Winner
Intertech Metaverse Hackathon - Winner
Somnia Mini Games Hackathon - 2nd Prize
HSBC Engagement Challenge - 2nd Place (National)
Hack4MMO - 2nd Place
KFC Ideathon - 2nd Place
Arçelik Innovation - 3rd Place
Malware Arena - 3rd Place
MusiCoinCity, EDU Chain - 5th Place

SKILLS

Languages: JavaScript, Python, Solidity

Frameworks and tools: React, Next.js, Node.js, Flutter, REST APIs

Areas: Full-Stack Development, Mobile App Development, Blockchain and Smart Contracts, AI/LLM Integration

ERASMUS+

Active participant in EU youth programs across **Lithuania, Italy, France, Romania, Poland, Norway**.
Topics: inclusion, civic tech, sports, environmental awareness. 15+ countries visited in total.

VOLUNTEERING

TEMA - Climate + sustainability outreach (ongoing)
Youth Eurasia - Intl. youth development (2022-2023)
BEST Ankara - University tech community (2021)

RESEARCH INTERESTS

HCI and speech interfaces, gamification in real systems, cybersecurity, system design, behavior-focused UX, civic tools, LLM-powered interfaces, small AI experiments in daily workflows
